Job Board - System Requirements

If your team is planning on running the Job Board in a self-hosted environment, you will need to follow the following minimum requirements:

Hardware Requirements	
Processor	Minimum 2 Cores
RAM<	4 GB
Disk space (minimum)	200 MB
Software Requirements	
TempWorks Enterprise Version	17r1 and later
Operating systems (32-bit and 64-bit editions)	Windows Server 2008, 2012
IIS - Internet Information Services versions	7, 7.5, and 8
.NET Frameworks versions	4.5.1
Browser Support	Chrome, Firefox, Safari - Latest two major versions Internet Explorer and Edge - Only the latest major version

It is recommended to start with the CPU Cores and RAM mentioned above and expand as necessary. Additional physical processors and cores may also be added as necessary. Proper system monitoring will determine when RAM and processors should be added to this server configuration.
