

Release Notes: 10/07/2016

Last Modified on 10/06/2016 2:06 pm CDT

No new Enterprise build this week, but we do have one HrCenter fix going out!

HrCenter:

- Previously, on any information page with checkbox or radio button fields (e.g. Availability page, Application info page) where those fields are required, if the form is submitted without making a valid selection, the "This field is required" message does not display. Now the message will display correctly when those fields are marked as such.
