

# Release Notes: 01/06/2017

Last Modified on 01/05/2017 4:08 pm CST

## What's New Version ∞2017.1.6:

- Added an approval check box to the 1094-C/1095-C worksheet. This is for users to mark that their survey answers and data have been reviewed and to acknowledge that TempWorks will begin performing the 1094-C and 1095-C services on January 17<sup>th</sup>, 2017.
- 1094 BenAdmin imports now allow null end dates.

## Enterprise:

- In the 1094-C/1095-C worksheet, initializing employees previously caused a warning message regarding deleting coverage data even if BedAdmin files had not been imported. This message now only appears after importing BenAdmin files and employee coverage data exists.
- Updated the 1094-C/1095-C worksheet drop down to display the current year and the two previous years.
- In dispatcher, an error message relating to overlapping check numbers has been updated for clarification. The error now reads 'The check range will result in duplicate check number. Please select a valid check start number.'
- Fixed a bug that could result in an error when attempting to navigating to worker comp claim through employee profile.

## Job Board:

- JobBoards will no longer pull in orders outside of the ApplicationHierId.
