Release Notes: 11/03/2017

**Version ∞2017.11.3**

Enterprise

New:

- Added a new optional CSV type mag media file for Georgia. This is in addition to the default GA ICESA file and will need to be setup by TempWorks Support in order for you to see this addition.

Improvements:

- Optimized the uMergeAident procedure that is used when merging employee records. Transactions will no longer be merged unless "Update Assignments and Transactions" is selected in Enterprise.

- Increased performance in the Data Integrity Check to reduce load times and prevent crashing issues. Also updated Error #6 to state, "There are employees with year-to-date wages that do not match the year-to-date wages on the checks. Please review and contact TempWorks Support for assistance."

- Made buttons that appear disabled appear more like that they are disabled. Below are images that were taken from the manage web user account area. Old is on the left and new is on the right.

  -

Fixes:

- Fixed the Date/Time field in the message details of messages created from ZipWhip texts.

- In a situation where a check had a secondary direct deposit that was epay, but the primary check was live, the secondary direct deposit would display as live on the Payroll Summary report. The secondary deposit in this situation will now display as epay.

- Fixed an obscure bug on the data grid in time entry.

WebCenter

Improvements:

- Users will be brought to the home page when signing into WebCenter or impersonating an employee/contact/vendor.

Fixes:

- Vendors editing employee info will no longer receive an error when updating SSN.
