Version ∞2018.2.9

Enterprise

Fixes:

- Previously, when creating a new authority, the Pseudo Aident on the Company was left as NULL. Now, it will be properly inserted and linked to the proper Authority and Employee records.

- Corrected the payroll error ""Employee FederalExemptions <> Federal allowances in PrEmployeeTax" that checks for mismatching federal allowances between the employee's pay setup page and taxes page. This will now function correctly for employees that are setup with visible tax records in two EINCs.

- Fixed the ADP Paycard Funding Run wizard so that the funding locations dropdown populates properly.

- The New Hire Packages buttons above the assignments section on the Order Visifile are now grayed out if multiple assignments are selected.

- Previously on an Everify case, if the employee is in a "Employee Referred to SSA" state, it would show the date submitted as the referral date. The date shown should be the date submitted and now is. Also, added Contact By Date and Referral Response Due Date to the SSA and DHS referral user control forms.

Maintenance:

- Deactivated the W-2 Reprint report; this report is only to be used for data pre 2010. To reprint W-2s, open the actions menu on an employee record and select "Reprint Wage Summary Forms.

  - Altered multiple procedures to link WebUserAccounts to HrCenter Product Instances if a product instance exists for the tenant.
