

Core - Adding Job Titles

Last Modified on 11/13/2018 2:06 pm CST

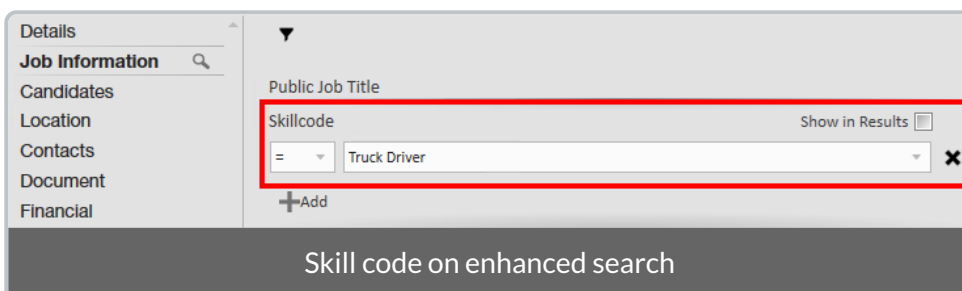

What is a job title/skill code?

Job titles and skill codes are synonymous in Enterprise Core. They both refer to a title or skill reference when creating an order or assignment.

In Core, you can find the job title field on both the Order and Assignment pages. You can also search employees by skill code under Enhanced Search options to find all employees who have had a specific job title before.

The screenshot shows a form titled "job information". It has two input fields: "Required" with the value "1" and "Assigned" with the value "1". Below these are two dropdown menus: "Order Type" set to "TE Temp" and "Job Title" set to "Truck Driver". The "Job Title" dropdown is highlighted with a red border. Below the form is a dark grey bar with the text "Job title on order record".

The screenshot shows a search interface for "Public Job Title". On the left is a sidebar with "Details" and "Job Information" selected. The main area has a "Skillcode" field with a dropdown menu set to "Truck Driver" and a "Show in Results" checkbox. The "Skillcode" field is highlighted with a red border. Below the form is a dark grey bar with the text "Skill code on enhanced search".

In order to select a job title on an order, the job title must first be set up by administration.

How to add new job titles in administration

1. Navigate to administration > Job Title
2. Select the + icon, in the upper right, to add a new job title
3. Enter the following information:

The screenshot shows the Administration interface. The top navigation bar includes 'Administration' and 'tasks appointments social ema'. The sidebar on the left lists various administrative functions, with 'job title' highlighted. The main content area shows '2 items available' and 'Main Job Title Info' for 'Warehouse Worker'. The form includes fields for Job Title, Division, Skill Code, Skill Code 2, Hier, Category, EEO Class, Career Builder Industry, Worker Comp Code, Show in WebCenter, Default, and Active.

- Job Title
 - Enter the title as you want it to appear in Enterprise Core
 - Select Division
 - Select Hier
 - This is the hierarchy level that this job title can apply to.
 - Ex. an internal job title would only need to be set on the class side of hierarchy.
 - Select Category
 - Optionally, select EEO Class
 - Optionally, select Career Builder Industry
 - Optionally, select a worker comp code that this job title will be associated with
 - Default
 - If this box is checked, than it is the default job title for new orders
 - Only one job title can be set as the default
 - Active
 - If this box is checked than this Job Title is active and can be used for any future orders
 - Once you no longer want to use a job title, deselect this box to deactivate this job title.
4. Select  in the upper left to save your changes
