

# HRCenter Overview

Last Modified on 08/02/2023 1:47 pm CDT

## What is HRCenter™?

HRCenter is our online application and on-boarding software. It allows your prospect employees to fill out basic information online that will automatically populate into your database and be seen in both Enterprise and Beyond. When you are ready to hire an employee, you can also forward important on-boarding documents including I-9's and W-4's that employees can fill out and sign electronically via HRCenter. These documents are then saved for your review and added to their employee record.

### Supported Platforms

- Chrome, Firefox, Safari, and Edge – Latest two major versions
- Internet Explorer - Only the latest major version

### Want to learn more about the application process?
