

Rapid! Paycards

Last Modified on 04/06/2026 10:37 am CDT

What is Our Rapid! Paycard® Integration?

TempWorks Enterprise™ and Beyond™ both integrate with [Rapid! Paycard](#) to activate and register paycard information for your employees without ever having to leave the software.

Note For more information and getting started with the setup of the Rapid! integration, please contact your TempWorks Account Manager.

How to Setup the Rapid Paycard Integration:

During the setup for this integration, you will be asked to create a personal access token for Rapid. Because Rapid works with our API, rapid will need this token in order to access the information needed to activate new paycards.

Navigate to Enterprise > All Options > Administration > Personal Access Tokens > Select "+" to add a new Personal Access Token:

The screenshot shows the 'Administration' section of the TempWorks software. The main content area is titled 'personal access tokens' and contains a table with the following data:

| User | Description | AccountSID | Expiration | Active | Revoke |
|-------------------------|--------------------------------|------------|------------|--------|--------|
| "XYZ Staffing" - Rapid! | "XYZ Staffing" - Rapid! Rapid! | [REDACTED] | 10/5/2027 | ✓ | ✕ |

A red box highlights the '+' icon in the top right corner of the table, indicating the button to add a new token.

Within the "Create Personal Access Token" window, enter the following:

- Service Rep: Select the appropriate Rapid! Service Rep for your company.
- Description: Rapid!
- Expiration: Select the appropriate timeframe in which the Personal Access Token will expire.

create personal access token

Service rep "XYZ Staffing" - Rapid!

Description Rapid!

Expiration 18 Months

Select allowed scopes for the token

- Assess On Cloud Results Write**
Allow write access of Assess On Cloud results
- Assignment Read**
Allow read access to Assignment data
- Assignment Write**
Allow write access to Assignment data
- Background Check Read**
Allow reading of Background Check related data
- Background Check Write**
Allow write access to Background Checks
- Contact Read**

Note During the setup of the Rapid! integration, please make sure to create a separate Service Rep record via Enterprise > All Options > Administration > Service Rep. This record will solely be used during the Personal Access Token setup of the integration.

For this example, we have named ours XYZ Staffing - Rapid.

- Employer Read**

With the Personal Access Token created, please save the AuthToken in a secure location in the event it needs to be referenced in the future:

Note For more information, please see the article titled [Personal Access Tokens](#).

How to Use the Rapid Paycard Integration:

Rapid paycards integrate seamlessly with our Enterprise and Beyond systems via an API connection. This means that the information you enter under the electronic paycard section will be found by Rapid when they check for new card information in your system.

Note Before being able to activate a paycard for an employee, the respective employee record must have the following:

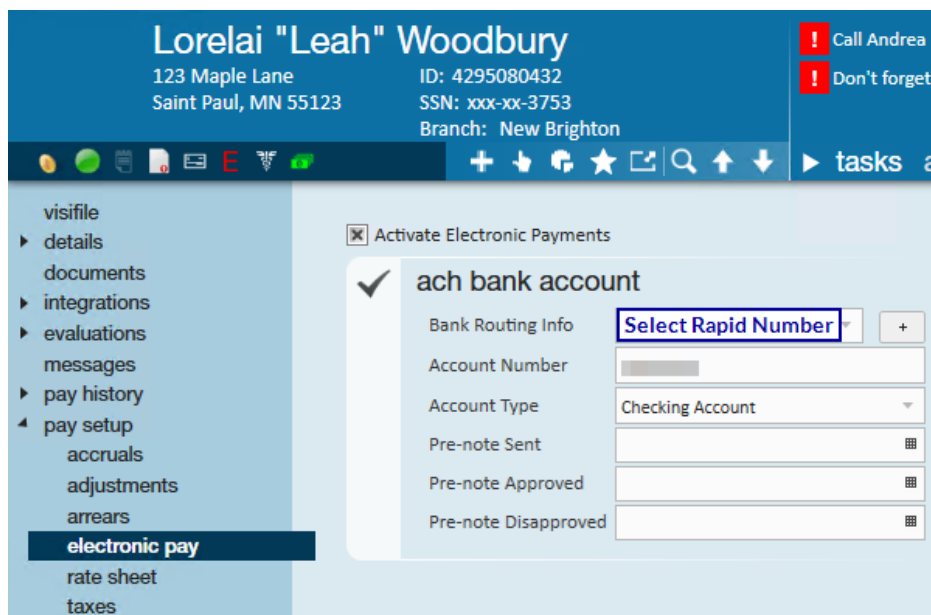

- SSN
- Date of Birth

- Address

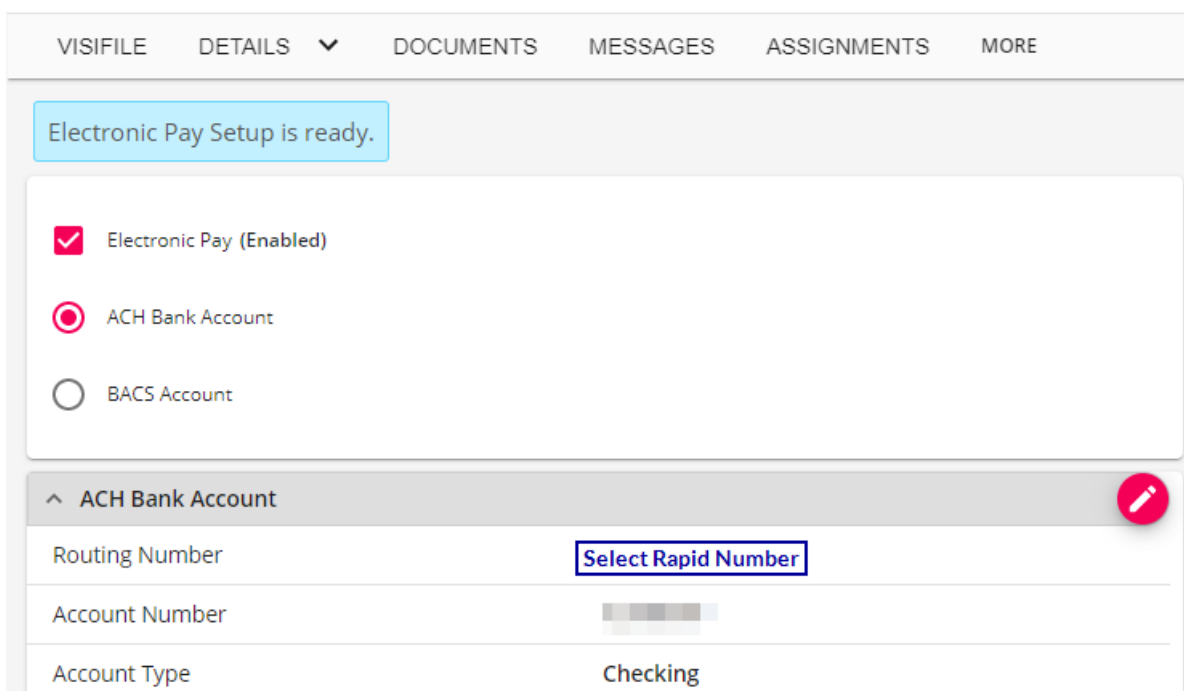

To Activate a Paycard:

1. Navigate to the employee record you wish to add a paycard to
2. Select Employee Pay Setup > Electronic Pay
3. Enter the routing number
4. Enter the card's account number with the Rapid prefix
5. Select save

In Enterprise:

In Beyond:

Note Rapid paycards can take up to an hour to activate on their network.
