

# Beyond - How to Assign a New HRCenter Workflow or Page

Last Modified on 01/26/2023 3:28 pm CST

## Assigning New Workflows or Pages

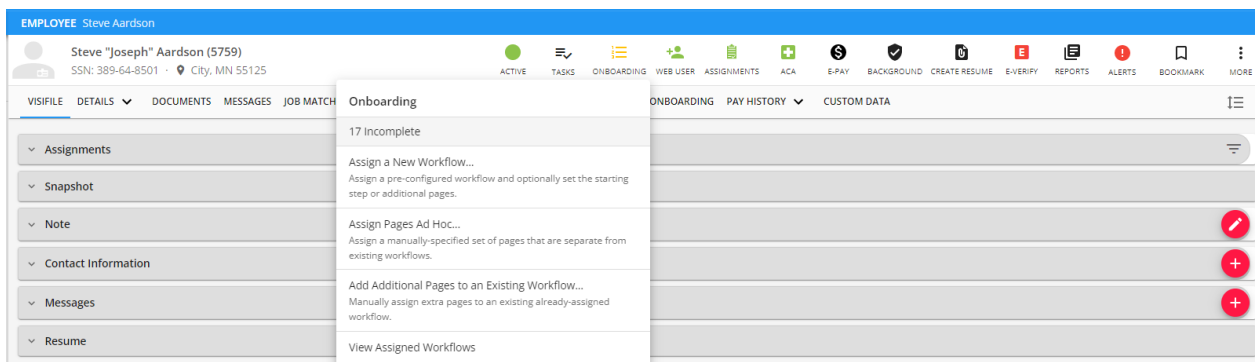

Current employees may need to fill out new workflows for specific customers or complete new I-9's and other documents. This will require your staffing specialists to assign new workflows or pages to them.

There are 3 Ways to Assign New Workflows or Pages:

1. Onboarding Charm
2. Onboarding Tab
3. Search Results (Assigning En Masse)

## Utilizing the Onboarding Charm

The onboarding charm located in the upper right will reveal the current records history with relation to onboarding:

It also serves as a quick way to add a new workflow to the employee record as well as additional pages separate from a workflow or to an existing workflow.

## Assigning Workflows or Pages from the Onboarding Tab

When you navigate to the employee's onboarding tab there will be an 'Assign' button in the upper right:

Additional Pages	Pages	Unstarted	11/5/2019		

This will allow you to assign an additional workflow or ad-hoc pages that need to be completed:

Once you select workflow or pages, you will be guided through a wizard to select your options. If you have notifications turned on in HRCenter, your employee will receive an email that there is a new workflow assigned to them.

You can also assign additional pages to a current application step by navigating to that step and selecting the add pages option on the pages card.

## From Search Results

You can assign a new workflow or page directly from a search result. This is a great option when you need to send out a new workflow or pages to multiple employees. You can assign from the employee or assignment searches.

1. Search for the employees you want to assign a new workflow or pages to
  - This can be from the employee or assignment search
  - Consider searching by interest code, current washed status, etc.

2. Select the box next to the employee(s) you want to assign the new workflow/page to
