Note that this is only for Timecard Entry and not Mobile Time Punching.

Self-Hosted Notes:

1.) Login server changes require a manual SQL migration script (20201120_self-hosted_sql_migrations.ps1 from the [TempWorks GitHub repository](#)) to be applied using appropriate paths:

```
> powershell.exe -ExecutionPolicy Bypass -File .\20201120_self-hosted_sql_migrations.ps1  
C:\ProgramData\TempWorks\config\login-server
```

****11/23/2020 Update:****

Add a "Redis" connection string to the api-jobservice-server configuration as shown in the sample [config/api-jobservice-server/appsettings.json](#) config. This should refer to the same redis server you are already using with the api-server, login-server, and beyond containers.
