

Release Notes: 04/23/2021

Last Modified on 04/23/2021 8:07 am CDT

It's National Cherry Cheesecake day so grab a dessert and check out our awesome updates below. ☺

Note For all self-hosted clients, as always, ensure you install all updates to give your users the best experience and new features.

The Highlights

Development Q2 Roadmap

Our Development team has created a public roadmap to show what we've been up to and some of our future plans to get everyone excited for what's coming next.

Check it out here: <https://www.tempworks.com/tempworks-roadmap-april-2021/>

Last Login Information

We've added last login information per product for web users in Beyond. You can now see and search by last login information for Buzz, HRCenter, and WebCenter starting 4/23/2021.

Check out [Beyond - Managing Web User Account](#) for more information

Additional Updates

In Beyond

- Fixed an issue causing an error message to appear for some users when attempting use the [background check search](#) (Beyond Menu > Records > Background Checks)
- Spaces will no longer be removed when adding custom data fields to a header when using an [email template](#)
- Fixed an issue where some users were receiving an error when trying to update [E-Verify credentials in Beyond](#)
- Updated the character limits regarding SSN and Alien/USCIS number for E-Verify C list documents
- The [Search Anything](#) option at the top of Beyond should no longer time out on larger searches
- Thanks to feedback from the [Community Hub](#), the basic search for Government ID will now search by last 4 of a SSN
