

Beyond - Customer Required Documents

Last Modified on 12/07/2022 10:15 am CST

Overview

Required documents allow you to store, track, and manage documents that are required for employees.

Users in Beyond have the ability to add and manage required documents on Customer, Job Order, and Employee records.

Note Required Document functionality is backwards compatible between Enterprise and Beyond. This means when a Required Document is created, modified, or removed within Enterprise, the same take place within Beyond. The process is the same from Beyond to Enterprise.

Note In order to view/add/edit Required Documents in Beyond, you must have the proper Security Group of Document Type with Read/Write permissions.

This article covers the following for Customer Required Documents:

Adding Customer Required Documents

Begin by navigating to the Customer record > Defaults > Required Documents:

Select the option for "+ Add Required Document" at the top right to open the window for adding a required document:

Select the following:

- **Category:** The category of the Required Document Type.
- **Type:** The Required Document Type.

Note You are able to add more than one Required Document at a time. Continue to select the Required Documents from the "Type" dropdown and they will appear within the "Documents" list:

Once the Required Documents have been added to the Customer record, you can do the following:

- Apply Required Documents to Customer Departments
- Edit
- Delete

Apply Required Documents to Departments

To allow Required Documents to apply to all Customer Departments, select the toggle that states "Apply required documents to departments":

Apply required documents to departments **+ ADD REQUIRED DOCUMENT**

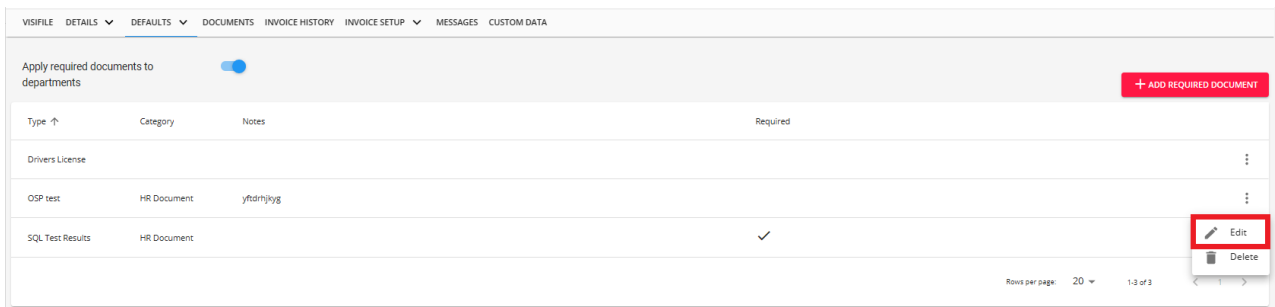

Type ↑	Category	Notes	Required
