Release Notes: 11/05/2021

With Halloween officially in the rearview, Mariah Carey has given everyone permission to start celebrating the holidays. This means it's also time to celebrate another release!

This release brings additions to fields that sync with Sense, along with fixes related to Beyond, Enterprise, and WebCenter.

> ***Note*** For all self-hosted clients, as always, ensure you install all updates to give your users the best experience and new features.

The Highlights

Sense Integration Updates

With this release, we have added additional fields that will sync with Sense utilizing the Journeys functionality of the integration. Sense articles have also been updated with information around the automatic one-time syncing of inactive records.

For more information, please see the following Knowledge Base articles:

- Sense Overview
- Beyond - Setting Up Sense
- Beyond - Using Sense Integration
- Beyond - Fields that Sync with Sense

Additional Updates

In Beyond

- Fixed an issue where the "Apply all billing to parent"/"Invoice department separately" toggle within Invoice Setup was not functioning as intended.

In Enterprise

- Fixed an issue where Required Documents without a category would not be visible when filtering a search by category.
- Fixed a visibility issue where an incorrect icon would show for the Required Document status.

In WebCenter

- Fixed a 'Failure Sending Email' error that would occur when emailing notifications from WebCenter.

Congratulations! You've made it to the end of the release notes. Like what you read? Click the thumbs up below.
