

Release Notes: 06/03/2022

Last Modified on 06/02/2022 11:25 am CDT

This release brings Single Sign On (SSO) and Assignment Email Template functionality to Beyond, along with plenty of tax updates and other fixes across TempWorks products.

Note For all self-hosted clients, as always, ensure you install all updates to give your users the best experience and new features.

The Highlights

Beyond - Single Sign On (SSO)

The ability to control access to Beyond using an external Identity Provider has been released.

This allows you to use your Identity Provider to enforce whatever sign in requirements you see fit, including things like multi-factor authentication, password strength requirements, or requiring the user to be logging in from a certain IP range or corporate network using corporate credentials.

Note For more information about getting this setup, and pricing inquiries, please contact your TempWorks Account Manager.

Note For more information on this functionality, please see the following articles:

- [Single Sign On \(SSO\) Overview](#)
- [Single Sign On \(SSO\) Identity Providers](#)
- [Beyond - Single Sign On \(SSO\)](#)

Beyond - Assignment Email Templates

The email template functionality in Beyond has been expanded to include assignment templates.

Note For more information on this functionality, please see the following articles:

- [Beyond - How to Import Email Templates from Enterprise](#)
- [Beyond - How to Create Email Templates](#)
- [Beyond - How to Utilize Email Templates](#)
- [Beyond - How to Manage Email Templates](#)

Additional Updates

In Beyond

- Fixed an issue where Job Order advanced searches would not provide results when utilizing the “Duration” field.

In Enterprise

- Fixed an issue with Authority Check Item calculation when an employee has multiple garnishment orders with different case numbers.

In HRCenter

- The word “Browse” has been underlined within the “Upload” screen to help define what the user can do when uploading documents within an HRCenter workflow.
- Fixed an “HTML” error that would be received from submitting an HRCenter workflow with an email template that does not contain text.
