

Release Notes: 08/12/2022

Last Modified on 08/12/2022 10:32 am CDT

This release brings the addition of a new default report, the addition of a "Select All" option within multi-select dropdowns when viewing reports in Beyond, a plethora of tax updates, and additional fixes across TempWorks products.

Note For all self-hosted clients, as always, ensure you install all updates to give your users the best experience and new features.

The Highlights

User Login History Report

The User Login History report can be used by administrators to see which users they will be billed for in a given time frame.

Note For more information on this report, please see the article titled [User Login History Report](#).

Additional Updates

In Beyond

- Added a "Select All" option within multi-select dropdowns when viewing reports.
- Fixed an error that would occur when running advanced searches after de-selecting "AND" options for multiple rules.
- Fixed an issue where the "is on" and "equals" operators were missing when running an assignment advance search. The operators are now appearing as intended.
- Fixed an error that would occur when running an advance search for employees or assignments when using the "Shift" field.
- Fixed an error that would occur when editing external service background check information within Beyond > B Menu > System Settings > External Services > Background Check > Edit.

In Buzz

- Fixed an error that would occur when attempting to update time within a Buzz timecard.

In Enterprise

- Updated the California Quarter End Mag Media Export to pull the entire first name instead of the first initial of the first name. This update is based on requirements from the state of California.
- Fixed an issue where Ohio taxed employees with multiple timecards in the same check would not have proper Ohio taxes applied to the check.
- Fixed an error that would occur when adding an Employer within Enterprise > All Options > Administration > Employer.
- Fixed an error that would occur when attempting to add a jurisdiction within Enterprise > All Options > Administration > Employer > Jurisdiction > Add New.
- Fixed an issue with the default Turnover Detail report where “Placements” would always appear as “0”. Now, the amount of “Placements” will correctly display.

In WebCenter

- Fixed an issue where WebCenter Vendor Management would count assigned employees incorrectly. Now, the number of employees assigned will appear correctly for Vendor orders.
