Release Notes: 09/08/2023

Last Modified on 09/07/2023 2:09 pm CDT

This release brings plenty of fixes and improvements across TempWorks products.

> ***Self-Hosted Action Required*** It is essential that the latest migration scripts are applied. Additional information regarding this change can be found within the Self-Hosted note at the bottom of this article.

Additional Updates

In Beyond

- Added "Check Date" field to the Beyond Employee advanced search.
- Fixed an issue preventing an employee hire status from including "/" within the name.
- Fixed an issue where adding a timecard adjustment with a $0.00 bill amount would not mark it as non-billable.
- Fixed an issue where the "Submitted By" field would not show the intended information after a candidate has been manually added to a job order.
- Fixed an issue where the user would not be navigated back to the login page after selecting the "back" button on the web browser after logging out of Beyond.

In Enterprise

- Fixed an issue where a workflow would generate a duplicate step when completing the first step.

In HRCenter

- Fixed an issue where signature validation would prevent applicants from having a first name included within the last name (i.e. Angel Edgar Angeles).

In Reports

- Updated the 2023 IL W-4 form per requirements of the state of Illinois.

In WebCenter

- Fixed an issue preventing PO Numbers from showing within invoices.

> **Self-Hosted Notes:**
>
> For all self-hosted clients, TempWorks will be performing updates for the Login Server over the next several releases. As a result, it is required that Self-Hosted clients make sure to install all hotfixes related to this

release as soon as possible and not skip a release.

Login server changes for this release require a manual SQL migration script (20230908_self-hosted_sql_migrations.ps1 from the TempWorks GitHub repository) to be applied prior to upgrading services using appropriate paths:

> powershell.exe -ExecutionPolicy Bypass -File .\20230908_self-hosted_sql_migrations.ps1 C:\ProgramData\TempWorks\config\login-server

---
