Release Notes: 12/01/2023

Welcome to December! This release brings the ability to control Enterprise access via Bridge along with plenty of additional fixes and improvements across TempWorks products.

Note For all self-hosted clients, as always, ensure you install all updates to give your users the best experience and new features.

The Highlights

Bridge - Allow Enterprise Access

In the event your employees are only working within Beyond, you may want to remove their access to Enterprise via apps.ontempworks.com. This is now controlled with a new "Enterprise Access" checkbox within user management in Bridge.

Note For more information on this functionality, please see the article titled Managing Users in Bridge.

Additional Updates

In Beyond

- When adding a Worker Comp Code within Customer Defaults, the drop down will now show all available Worker Comp Codes.
- Updated the US country calling code field label in Beyond to include Canada when adding an Employee/Customer/Contact phone contact method.

In Bridge

- Added a checkbox to "Add" and "Edit" user screens for allowing Enterprise RDP (apps.ontempworks.com) access.

In Enterprise

- Added a new "CFICA/EFICA out of balance" payroll proofing error if the exemption status does not match

for the employee for EMED and CMED.

In HRCenter

- Fixed an "sequence contains no elements" error that was being received when previewing background images within forms.

In Reports

- Updated the default Assignment Register report to print/export all columns within a single page.

In WebCenter

- Fixed an error that would be received when attempting to edit TimeClock timecards.

Congratulations! You've made it to the end of the release notes. Like what you read? Click the thumbs up below.
