

Release Notes: 03/22/2024

Last Modified on 03/21/2024 4:00 pm CDT

This release brings a complete redesign of the Registration Page within HRCenter, the Work Interests card within Beyond, tax updates, and additional fixes and improvements across TempWorks products.

Note For Self-Hosted clients, it is essential that the latest migration scripts are applied. Additional information regarding these changes can be found within the Self-Hosted note at the bottom of this article. As always, ensure you install all updates to give your users the best experience and new features.

The Highlights

HRCenter Registration Page Redesign

The registration page within HRCenter has been redesigned for an improved user experience, including an easy to navigate sign-in experience that is fully optimized for mobile devices.

Additional Updates

In Beyond

- Fixed an issue where tags on Tasks would still appear after the tags have been removed.
- Fixed an issue where “Authority” records would show within the “Employees - New Applicants By Branch” Beyond Dashboard Widget.
- Fixed an issue where contact records that were deactivated via custom “inactive” contact statuses would still appear within customer records.
- After conducting an employee search and modifying the results via moving/hiding columns and/or changing sorting, navigating to a different page and then back to the search results will preserve the changes you’ve made to the search results.

In Enterprise

- Fixed an issue preventing the updating of the Candidate Status.

In HRCenter

- Updated the North Carolina W-4 based on state requirements.
- Fixed an issue where the employee’s name would prefill in the incorrect order within the Wisconsin W-4.

In WebCenter

- Fixed an error that would occur when attempting to edit an email address within WebCenter.

Self-Hosted Notes:

Login server changes require a manual SQL migration script (20240322_self-hosted_sql_migrations.ps1 from the [TempWorks GitHub repository](#)) to be applied using appropriate paths:

```
> powershell.exe -File .\20240322_self-hosted_sql_migrations.ps1
C:\ProgramData\TempWorks\config\login-server
```
