

# Beyond - Data Utilized by SystemIQ

Last Modified on 07/30/2025 12:12 pm CDT

## Overview

With the SystemIQ integration, you can tap into AI-driven assistance, helping to generate content quickly, reducing the need for manual writing and enabling you to focus on more strategic aspects of recruitment.

Content can be generated for individual record types using pre-defined prompts, custom prompts, and more.

This article outlines the fields that provide the data to SystemIQ when generating responses from prompts.

**\*Note\*** The SystemIQ integration requires additional licensing. Please contact your TempWorks Account Manager for more information.

## Employee

The following fields related to the Employee record can be included within generated responses by SystemIQ:

- Basic Information
  - First Name
  - Last Name
  - Washed Status
  - Status
  - Address
    - Municipality (City)
    - Region (State)
    - Postal Code
    - Country
  - Web Username
  - Branch Information
    - Branch Name
    - Phone Number
    - Email Address
    - Address
