

Release Notes: 08/07/2026

Last Modified on 08/06/2026 3:32 pm CDT

This release includes tax updates along with additional fixes across TempWorks products.

Additional Updates

Beyond

- Fixed the following issues related to [In-App Notifications](#):
 - Fixed an issue where “Sent” or “Failed” notifications would show the incorrect status of “Processing”.
 - Fixed an issue where the “Last Sent” date would only populate when the grid is refreshed. Now, the date will update immediately upon the sending of a notification.

HRCenter

- Updated the “Expiration Date” field to be required within the default Federal I-9 form.
- Removed the highlighting of the "Exemptions" box within the default Federal W-4 form.

Tax Updates

- Arkansas

- Wyoming
 - Updated the wage base to \$82,000, effective 1/1/2027.

For Self-Hosted Clients

Note WebCenter is doing a security update, as part of the **8/7/2026** release. As a result, a manual code change will need to be applied to your “Web.config” file.

It is recommended that you create a backup of your “Web.config” file before proceeding with applying the updated code.

To apply the code changes, you will need to find the "<runtime>" section of your “Web.config” file and replace it with the following code within the attached [.TXT file](#) .

In the event you apply the 8/7/2026 update and have not applied the code changes to your “Web.config” file, you will receive an error upon accessing WebCenter. Please do not make the change until you are ready to apply the 8/7/2026 Release.

Note For all self-hosted clients, as always, ensure you install all updates to give your users the best experience and new features.

Congratulations! You've made it to the end of the release notes. Like what you read? Click the thumbs up below.
