Release Notes: 10/30/2026

Last Modified on 10/29/2026 4:10 pm CDT

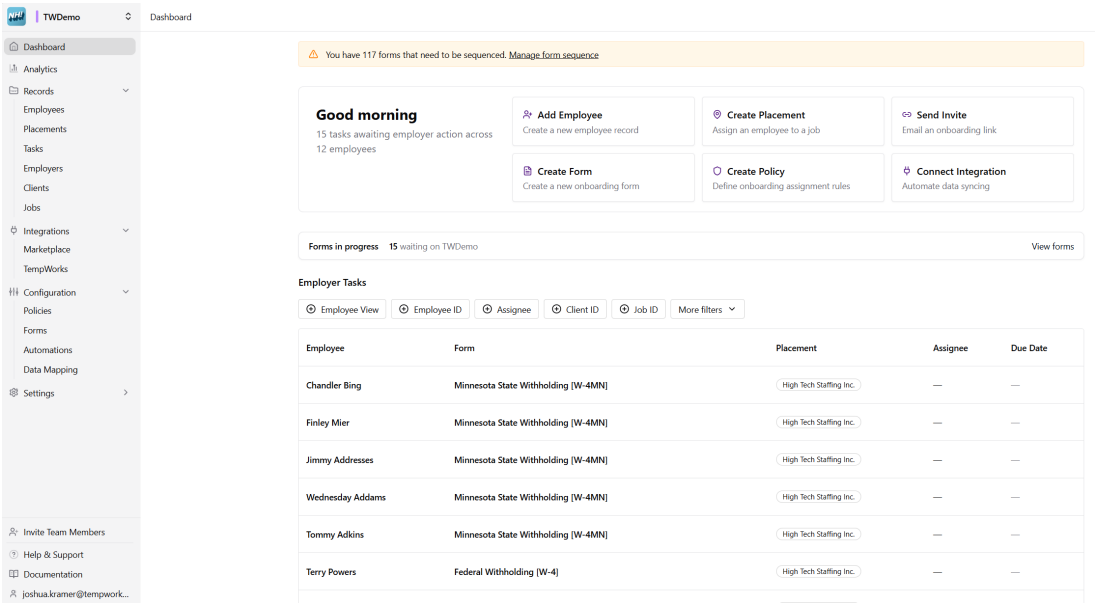
This release brings the TempWorks Onboarding Solution, the ability to CC invoice email recipients in Beyond, an update to the Federal Overtime Automation in Enterprise, along with additional fixes across TempWorks products.

The Highlights

TempWorks Onboarding Solution

With the TempWorks Onboarding Solution, your application and onboarding forms are managed and accessed within an efficient, online, mobile friendly experience for your applicants and service reps.

> *Note* To discuss setup of the TempWorks Onboarding Solution, please contact your TempWorks Account Manager.



Through this onboarding experience, you can...

- Create feature-rich forms from scratch, through the uploading of PDF's, or through the use of the AI Form Builder.
- Link your forms to policies to ensure employees are receiving the correct forms, every time, automatically, based on your set conditions.
- Trigger automations that run when specific events are completed. From the automatic sending of an email once a task has been completed by a candidate to posting a message on the employee profile within Beyond when form fields have been completed, the options are vast.

> *Note* For more information, please see the article titled Onboarding - Overview.

OBBBA - Update to When Federal Overtime Hours Populate

To improve system performance while maintaining the functionality of the Federal Overtime Hours calculation, the Federal Overtime Automation has been updated so that the calculated Federal Overtime Hours will populate within the Detailed Timecard once the timecard has been processed through payroll, rather than immediately after hours are entered/saved on the timecard.

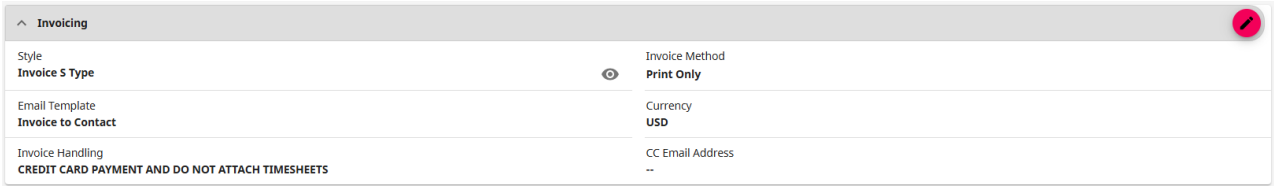
The estimated Federal Overtime Hours will still be calculated and available for review and editing; however, the value will not populate in the detailed timecard until the timecard has been posted.

> *Note* For more information, please see the article titled Overtime Wage Reporting Tools – One Big Beautiful Bill Act (OBBBA).

Additional Updates

Beyond

- Additional fields have been added to the "Invoicing" card of the Customer Invoice Setup including:
  - Currency
  - Invoice Handling
  - CC Email Address



> *Note* For more information, please see the article titled Beyond - How to Manage Billing Setup.

Enterprise

- Fixed an issue preventing invoice emails from sending as intended.

TimeIntel by TempWorks

- Fixed an issue where punch times were not being logged as intended.

For Self-Hosted Clients

Note For all self-hosted clients, as always, ensure you install all updates to give your users the best experience and new features.
